

## CHUCKS

### *FOR OVER 40 YEARS...*

Loadpoint have manufactured premium quality chucks of worldwide renown. Each and every one durable and reliable and manufactured with our own hallmark care and superior workmanship.

### *LOADPOINT CHUCKS STAND THE TEST OF TIME*

But we know that the wheels of industry don't stop turning, and with the passing years bring wear and tear and the looming threat of costly interruptions to production.

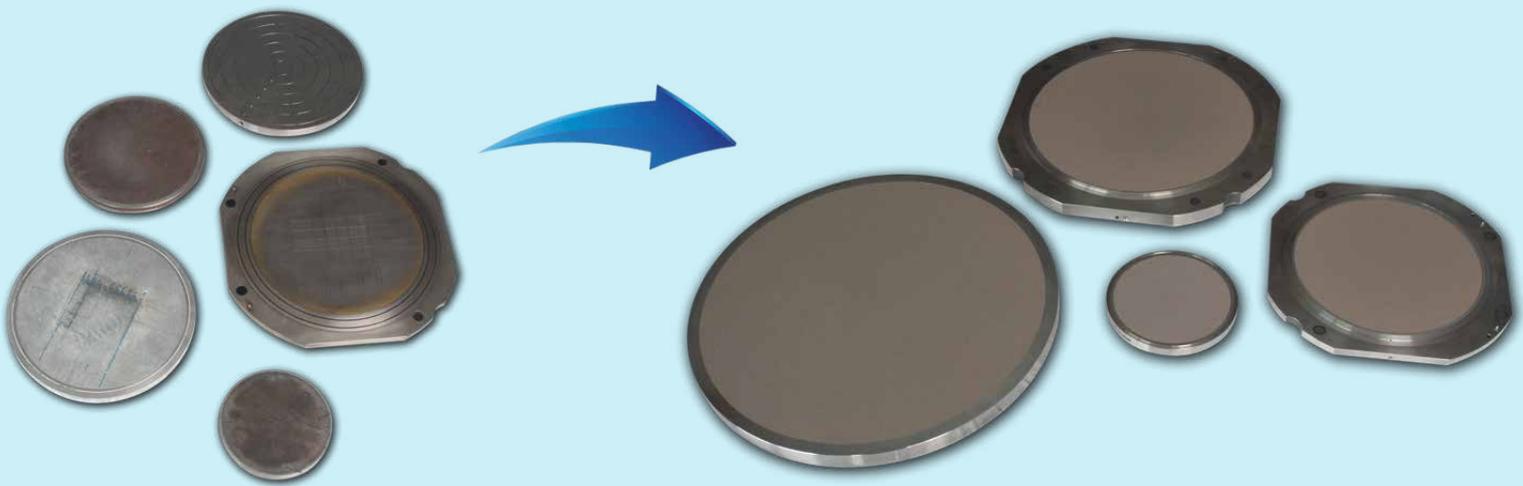

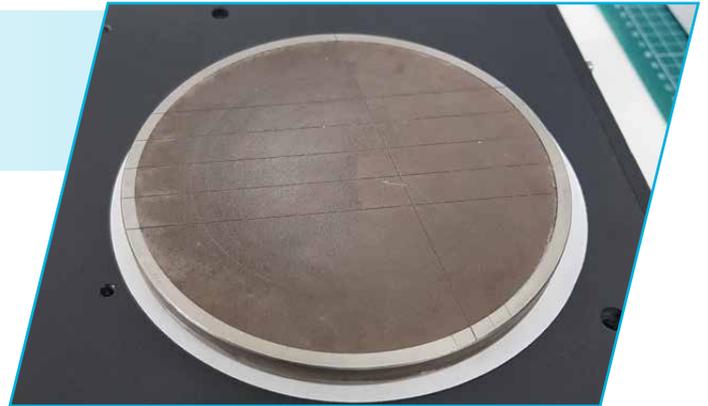

# CHUCKS

## CHUCK SURFACE DAMAGE COMPROMISES WORK QUALITY

A worn, damaged chuck showing cuts scribed into the ceramic surface. Surface cuts are a major cause of back face chipping and fracture of lower thickness components.

Chips and Cuts impact accuracy and the ability to hold your component securely and uniformly. Why not banish complacency and secure peace of mind with the pre-emptive strategy and sound forward planning of a business built to last?

At Loadpoint, we like to stay one step ahead of the game, and so our product development team have been busy innovating! We pioneered the technology, and now we've made that tech better in ways we'd love to share with you.

Our sophisticated chuck table systems are manufactured using fine porous ceramic and stainless steel to deliver impeccable levels of performance and tight tolerances.

### Savvy, strategic investment will;

- Reduce wastage
- Enhance efficiency
- Drive up productivity
- Increase profits and help you to gain a competitive edge.
